

**MYTH 1: IT IS TOO
EXPENSIVE TO BE
ENVIRONMENTALLY
SUSTAINABLE**

BUSTED!

Reality: Implementing environmentally sustainable practices doesn't have to be expensive. In fact, many sustainable practices can save you costs and increase your profitability in the long run.

MYTH 2: SMALL CHANGES WONT MAKE A DIFFERENCE

BUSTED!

Reality: Small changes can make a big impact when it comes to addressing climate change. By making simple changes to our daily habits, we can collectively make a difference in the fight against climate change.

**MYTH 3:
REUSABLE
INSTRUMENTS
ARE NOT SAFE**

BUSTED!

Reality: Using reusable instruments with optimal sterilization in healthcare is safe and better for the environment. By investing in reusable instruments, healthcare facilities can reduce waste and save money in the long run.

MYTH 4: CLIMATE CHANGE DOES NOT IMPACT OUR HEALTH

BUSTED!

Reality: Climate change is not just an environmental issue - it's a public health issue too. The World Health Organization predicts that climate change will cause an additional 250,000 deaths annually between 2030 and 2050.

MYTH 5: CLIMATE CHANGE SHOULD NOT BE A PRIORITY FOR EYE HEALTH

BUSTED!

**Reality: Climate change increases the risk for a number of eye diseases and disrupts service delivery.
By prioritizing sustainable practices and building resilience, we can reduce our carbon footprint, and to adapt to the impact of climate change.**
