Sight loss

These data for sight loss comes from the modelled estimates by the Vision Loss Expert Group (VLEG) in 2020, incorporating data from 512 studies in 112 countries. **Select the filter below right for more data.** For more detail and data, access [the current Vision Atlas](#).

measure

Age std. prevalence

Source: [Bourne et al., 2021](#)

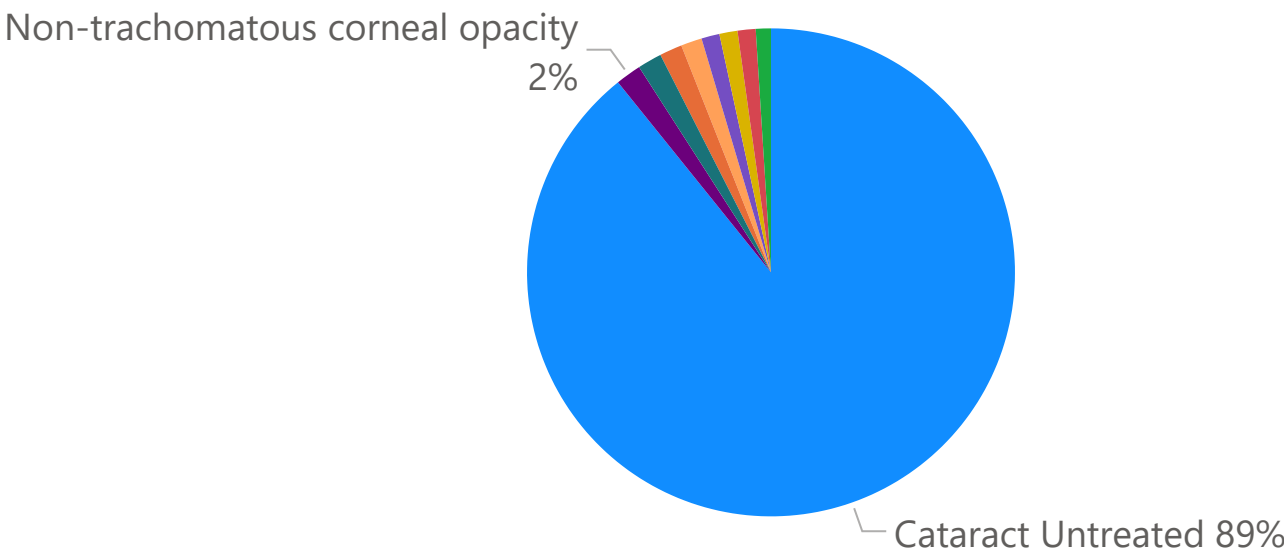

Cause data

Cause data, for distance sight loss only, are gathered from national [RAAB surveys](#) or national [Blindness and Vision Impairment surveys](#) where available. **If the areas are blank below, no data is available from this country yet.**

Blindness by Cause

Severe VI by Cause

Moderate VI by Cause

Early (Mild) VI by Cause

Endemic diseases

Effective cataract surgical coverage (eCSC)

Effective cataract surgical coverage (eCSC) measures the number of people in a population who have been operated on for cataract, and had a good outcome, as a proportion of all people operated on or requiring surgery.

Source: [McCormick et al., 2022](#)

eCSC: Effective Cataract Surgical Coverage (6/18)

CSC: Cataract Surgical Coverage (6/18)

Relative quality gap

38

Year

2017

Cataract surgical service delivery

Cataract surgical rate (CSR) is the number of cataract operations performed in one year, per million population.

| CSR | Source | Year |
|-----|----------------|------|
| 196 | Key respondent | 2014 |

Cataract surgery: average out of pocket cost

These data are sourced from the [2030 IN SIGHT: Country Progress data portal](#), using a survey designed for key country informants. **If cells are blank below, no data has been received yet.**

| | |
|------------------------------------|---------|
| Cataract Surgery Cost - Govt | \$185 |
| Cataract Surgery Cost - Non-profit | \$100 |
| Cataract Surgery Cost - Private | \$1,000 |
| Cataract Surgery Cost Details | |

Effective refractive error coverage (eREC)

Source: [Bourne et al., 2022](#)

eREC is the proportion of people in need of refractive error services who have received services and have a good-quality outcome.

| state | district | Year | Female (6/12) | Male (6/12) | All (6/12) | Female (6/18) | Male (6/18) | All (6/18) |
|-----------|----------|------|---------------|-------------|------------|---------------|-------------|------------|
| Highlands | | 2017 | 1 | 13 | 8 | 6 | 16 | 13 |
| Coastal | | 2017 | 23 | 39 | 34 | 29 | 44 | 34 |
| NCD | | 2017 | 34 | 38 | 36 | 41 | 50 | 46 |

Spectacle need and use

These data are sourced from the World Health Organization (WHO)'s [Global Report on Assistive Technology](#).

| | |
|---------------------------------|--|
| Prevalence of spectacle need | |
| Prevalence of met need | |
| Prevalence in use of spectacles | |

Good quality spectacles: average out of pocket cost

These data are sourced from the [2030 IN SIGHT: Country Progress data portal](#), using a survey designed for key country informants.

|------------------------------|--|
| Spectacles Cost - Govt | |
| Spectacles Cost - Non-profit | |
| Spectacles Cost - Private | |
| Spectacles Cost Details | |

UHC Service Coverage Index

Source: [WHO](#)

This WHO indicator measures the coverage of essential health services in each country. The lead indicator is based on interventions that include reproductive, maternal, newborn and child health, infectious diseases, non-communicable diseases and service capacity and access, among the general and the most disadvantaged population.

50
Non-communicable diseases

11
Service capacity and access

46
Infectious disease

48
Maternal and child health

Eye health commitments and prioritisation

These data are sourced from the [2030 IN SIGHT: Country Progress data portal](#), using a survey designed for key country informants, such as national eye coordinators, key IAPB members, and WHO representatives. **If cells are blank below, no data has been received from this country.**

| | |
|---|--|
| Coverage from government or health insurance to prevent out-of-pocket costs | High-out-of-pocket costs |
| Strong public health leadership | Very limited: Needs establishing |
| Integration of eye care into legislation, policies and plans | Needs major strengthening: There is very limited integration of eye care into health policies and plans. |
| % of school-aged children undertaking screening for eye conditions | Less than 25% |

IAPB Members Country Activities: Elevate

IAPB asks members to inform about their work across specific countries. These data are sourced from a survey in the [2030 IN SIGHT: Country Progress data portal](#). **If cells are blank below, no data has been received from this country yet.**

Planning & implementation

These data are sourced from the [2030 IN SIGHT: Country Progress data portal](#), using a survey designed for key country informants, such as national eye coordinators, key IAPB members, and WHO representatives. **Green circles indicate effectiveness, yellow is partially effective and grey is limited effectiveness. If circles are white and cells are blank below, no data have been received from this country yet.**

Strong leadership?

Effective coordination among stakeholders?

ECSAT conducted?

Effective plan for eye health?

Effective operational planning?

Eye care indicators in health systems?

View all data

2023

Year data was submitted

| | |
|----------------------------------|---|
| Eye Health Coordinator | Yes |
| Eye Committee | Yes |
| Eye Health Plan | Yes |
| Public Health Leadership | Very limited: Needs establishing |
| Eye Care Legislation | Needs establishing: Legislation and policy frameworks are absent or encompass eye care inadequately. |
| Strategic Eye Health Plan | Partially effective |
| Strategic Plan Status | Plan followed effectively by non-governmental organisations. |
| Stakeholder Coordination | Needs major strengthening: There has been limited stakeholder consultation in the planning of eye care. |
| Integration with Health Planning | Partially |
| Health Plan Integration Aspects | Services coordination, Human resources |
| Eye Care Integration Progress | Policy around including the Centre of Excellence within the medical school. |
| Operational Planning Adequacy | No |
| Operational Planning Description | Subsequent to completion of the strategic plan, and allocation of funding. |
| Eye Care Services Integration | Partially |
| Eye Care in Other Sectors | Noncommunicable disease, School Health/Health Schools, Education, Rehabilitation |

Eye care workforce
