

# LEADERSHIP FOR EYE HEALTH SERIES

## Vision Statement Activity

**Vision A: Achieve universal school-based vision screening for all children aged 5–15 by 2030.**

Focus: measurable outcomes, child health

Likely supporters: education ministries, NGOs, donors

**Vision B: Ensure integrated, equitable, and lifelong access to eye health as part of universal health coverage.**

Focus: systems, sustainability, policy change

Likely supporters: ministries of health, multilateral agencies

**Vision C: Empower communities to demand quality, culturally appropriate eye care services.**

Focus: equity, participation, bottom-up change

Likely supporters: civil society, local leaders, rights-based organisations

### **Breakout Discussion Prompts:**

- Which vision resonates most with you, and why?
- Does each vision speak to the whole system, or only part of it?
- What tensions or trade-offs exist between the different visions?
- Which actors might support – or block – each one?
- How might you arrive at one shared vision?
