

## Orbis Flying Eye Hospital - Shenyang Meeting Overview

From September 5, 2016 until September 23, 2016 the new Orbis Flying Eye Hospital will conduct its first ever medical and clinical program in Shenyang in cooperation with He University Eye Hospital and the National Training Base for the Prevention of Blindness of P.R.China. This historic program will feature training across a wide variety of children's and adult's eye diseases for ophthalmologists, bio-medical engineers, nurses, residents and other eye care team members. This program will draw great attention from government, business, medical and civil society communities. In order to maximize this incredible platform we are planning to host a variety of high level symposium during the three week program.

**Host:** National Training Base for the Prevention and Treatment of Blindness of P.R.China

**Co-host:** Orbis International, Vision 2020 Liaoning Provincial Office

**Organizer:** He University Eye Hospital

## Orbis International

Orbis International is an international non-profit non-governmental organization (NGO) dedicated to saving sight worldwide. Orbis programs focus on the prevention of blindness and the treatment of blinding eye diseases in developing countries. Since 1982, Orbis capacity-building programs have enhanced the skills of 325,000 eye care personnel and provided medical and optical treatment to more than 23.3 million people in 92 countries.

## He University Eye Hospital

He University Eye Hospital, the only comprehensive eye care system integrated with medical service, education and training, ophthalmic research, eye industry and public eye care, was established by Dr. Wei HE in 1995. He Eye Care System is comprised of nine eye hospitals, more than 50 vision centers, He University, and one eye industry base which focuses on eye products development. He University Eye Hospital is the National Key Clinical Center in Ophthalmology, and the only National Training Base for the Prevention and Treatment of Blindness of P.R.China. It has been adhering to its value of “Technology & Humanity” and will continue devoting itself to further improve eye care in China.

## **National Training Base for the Prevention and Treatment of Blindness of P.R.China**

Approved by National Health and Family Planning Commission of P.R.China (known as Ministry of Health of P.R.China), the National Training Base for the Prevention and Treatment of Blindness was established in 2012 in He University, China, which is the first and only training center in national level in China. The base is undertaking training for medical and management staff in eye care service for the entire China. A large number of qualified talents have been trained and the problem of lacking experts for the prevention and treatment of blindness in China is expected to be relieved.

### **Meeting Agenda**

<b>Date</b>	<b>Meeting</b>	<b>Location</b>	<b>Language</b>
Sep. 5 (Mon.)	International Forum for the Prevention and Control of Myopia	Shenyang, China	English, Chinese
Sep. 5 (Mon.)	Roundtable on International Standardized Resident Training Model	Shenyang, China	English, Chinese
Sep. 10-11 (Sat.- Sun.)	International Forum for Ophthalmologic Nursing	Shenyang, China	English, Chinese
Sep. 16-18 (Fri. - Sun.)	International Symposium for Ophthalmic Development	Shenyang, China	English, Chinese

## **International Forum for the Prevention and Control of Myopia**

Globally, uncorrected refractive errors are the main cause of moderate and severe visual impairment. Refractive error is the major cause for the uncorrected visual acuity, of which myopia is the first. Myopia is the most common refractive errors in the world. Missing prevention and control of myopia at the early stage increases the likelihood of life-long eye care problems. The current number of people with myopia in China is 400 million among 1.3 billion population in China. Myopia affects 1 in 3 people in China and is fast becoming a major public health issue. In particular, the prevalence of myopia among school-aged children has increased dramatically as China has the second highest onset rate and largest number of people with juvenile myopia in the world. In order to globally improve the ability of juvenile myopia prevention and control, research and studies regarding juvenile visual development, prediction, prevention and early interventions of juvenile myopia are actively being conducted. This Forum aims to discuss ways to band together for facing the severe situation of myopia prevention and control in China.

➤ **Invited Speakers includes:**

**Jia QU, China**

- Director of National Engineering Research Center of Optometry
- Director of National Center of Optometry
- Member of National Expert Group on the Prevention and Control of Myopia by Ministry of Education

**Xiangdong HE, China**

- Executive President of He University
- Member of Optometry Branch, Chinese Medical Association
- Chair of Liaoning Optometric and Optical Association

**Scott Rozelle, U.S.**

- Senior Fellow for International Studies at Stanford University
- Visiting Professor of Renmin University of China
- Winning of China International Science and Technology Cooperation Award by the State Council of P.R.China

**Nathan Congdon, U.S.**

- Professor of Zhongshan Ophthalmic Center, Sun Yat-Sen University
- Head of State Key Laboratory of Ophthalmic of China
- Senior Adviser of Orbis International

**Roundtable on International Standardized Residency Training Model**

The establishment of standardized residency training program plays a decisive role in the development of human resources, which is the key to achieving the objective of “VISION 2020 - The Right to Sight”. In the recent years, residency training for ophthalmologists in China kept the tendency of fast development with support from Chinese government and NGOs, including introducing International Council of Ophthalmology (ICO) standards, learning from the US, Japan and other developing countries, etc. This Roundtable meeting will focus on how to establish standardized residency training model in line with the national condition in China by utilizing international experiences, in order to improve and develop the medical service level in China.

➤ **Invited Speakers includes:**

**Ningli WANG, China**

- President of National Guiding Committee of Blindness Prevention
- Standing Committee Member of Ophthalmological Branch, Chinese Medical Association
- Vice President of Beijing Tongren Hospital

**Wei HE, China**

- President of He University
- Co-Chair of Inapb in the Western Pacific Region
- Member of the Advisory Committee, International Council of Ophthalmology

**Kanxing ZHAO, China**

- Former President of Tianjin Eye Hospital
- Board Member of International Council of Ophthalmology
- Member of Academia Ophthalmologica Internationalis

**Janos Nemeth**

- MD, PhD, DSc
- Semmelweis University, Budapest
  - Clinical Pharmacology, Ophthalmology, Rehabilitation Medicine

### International Forum for Ophthalmologic Nursing

The forum aims to strengthen the construction of ophthalmic nursing in China by exchanging experience with national and international speakers. Invited speakers will include ophthalmic nursing staff from Orbis International, domestic experts, etc. Participants are expected to combine leading-edge knowledge with existing methods in ophthalmic nursing to meet the demand in practice.

➤ **Invited Speakers includes:**

**Janet Marsden, U.K.**

- Professor of Ophthalmology and Emergency Care
- Faculty of Health, Psychology and Social Care
- Manchester Metropolitan University Manchester, United Kingdom

**Dina Elisa Urruchi Huamán, Peru**

- Staff Nurse, International Orbis FEH
- Co-founder & executive board, Ophthalmological Nursing Peruvian Association

**Lily ZHANG, U.S.**

- Staff Nurse, Ophthalmology Team Leader
- RWJUH at Somerset, Somerville, New Jersey, U.S.

**Alice Lee, Canada**

- Clinical Nurse Leader, Operating Room
- Mt. St. Joseph Hospital Vancouver, British Columbia, Canada

**Katie Hallahan, U.S.**

- Orbis Ophthalmology Fellow
- Global Blindness Prevention and International Ophthalmology fellow, Truhsen Eye Institute, US

**Xiaoying LIU, China**

- Staff Nurse, International Orbis FEH, China

➤ For more information: Ms. Du, 86-24-86502018, dty1016@163.com, obris2016@163.com

## International Symposium for Ophthalmic Development

The symposium will invite well-known international and national ophthalmologists from Orbis International and He University Eye Hospital, etc. Academic discussions will be held on cataract, glaucoma, retina, cornea diseases, pediatric eye diseases and other common eye diseases. Participants are expected to gain fore-front ophthalmic information to serve the patients better.

➤ **Invited Speakers includes:**

**Bruce Furr, U.S.**

- Director of the Orthoptic Training Program
- Clinical Assistant Professor, Ophthalmology and Visual Sciences
- Member of American Academy of Ophthalmology (AAO)

**Douglas Fredrick, U.S.**

- Clinical Professor of Lucile Packard Children’s Hospital
- Director of the Residency Training Program of Stanford University
- Member of AAO

**Vincent Lee, Hong Kong**

- Member of Hong Kong Ophthalmological Society
- Academician of Royal College of Surgeons of Edinburgh

**Ian Yeo, Singapore**

- Singapore National Eye Center
- Vitreo-Retinal Department
- Senior Consultant

➤ **For more information: Ms. Hao, 86-24-86502018, haowudi527@sina.com, obris2016@163.com**

## Expenses

1. Registration fees will be covered by He University Eye Hospital.
2. Accomadations , lunch and dinner will be arranged and paid by Orbis International and He University Eye Hospital.
3. International travel expenses will be paid by the participants tehmselves.
